

Moline Cake Donut Cutters

Providing Durability and Efficiency With Every Cut.

Moline cake donut cutters are available in a variety of styles to cut specific donut shapes efficiently and uniformly. Installed in a Moline DonutKing Depositor or Belshaw Depositor, the durable design of the cutters provides reliable and continuous service.

During operation, the plunger slides up and down through the forming cylinder, cutting batter into product with each plunger cycle. The depositor must have a compatible cylinder plate (also sold separately) for the type of cutter to be used.

Cutter assemblies are stainless steel and consist of a plunger, a forming cylinder and a cylinder clamp (each component is sold separately).

Cutter assemblies are easy to remove from the depositor and can be quickly disassembled for sanitation.
