

Rotary Dough Cutters

Standard Models For Retail Bakeries and Foodservice Outlets

Providing efficient cutting of many products including raised donuts, bismarks, biscuits, croissants, long johns, scones and turnovers.

- **A wide variety of cutters available to suit nearly any application.**
- **Provides fast and efficient production with optimum dough handling.**

Moline standard rotary cutters are precision machined to perfect concentricity for accurate and fast production. All cutters are designed for durability, easy sanitation and positive dough release.

As a manufacturer of both cutters and cutting equipment, Moline is uniquely positioned to offer years of

design experience and integration along with excellent value. A variety of styles are available for both machine and bench use. Precisely manufactured on CNC milling equipment out of 6061 aluminum material, these are durable cutters made for rigorous use in commercial bakeries. Material options also include high density polyethylene (UHMW white).

Moline Has A Cutter to Suit Your Production Needs

Cutters for Machine Use

Our machine cutters are designed for use on sheeters and make-up tables manufactured by Moline, Rondo, Acme, LVO and others.

Cutter patterns and shafts fit standard 22" and 24" wide belts.

(For larger industrial cutters, see our Industrial Cutters brochure.)

Scrapless Cutters

Our scrapless cutters simplify production and increase output by eliminating scrap dough web. These cutters are available in machine and bench styles (including Junior models). If you are presently using a round cutter, order the next size smaller in the hexagon scrapless style to obtain an equivalent product size.

Scrapless Hex Donut Cutter
Used for cutting yeast-raised donuts. The hex pattern provides a scrapless cut.

Long John Cutter
This rectangular cutter is used for cutting long johns, hot dog buns, sticks and bars.

Scrapless Hex Biscuit Cutter
Used for cutting biscuits and bismarks. The hex pattern provides a scrapless cut.

Turnover Cutter
Used for cutting fruit-filled turnovers and similar items. Sizes: 5" x 5", 4-1/2" x 4-1/2", 4" x 4".

Round Donut Cutter
The round donut cutter is used for cutting yeast-raised donuts. (Shown with optional low-friction coating.)

Strudel/Bear Claw Cutter
Cutter positions are adjustable. Bear claw section uses 3/4" spacing with 1-1/4" long blades.

Round Biscuit Cutter
Used for cutting rolls, biscuits and bismarks.

Strip Cutter
Eleven stainless steel 4-1/2" dia. cutting blades. Cutting width can be adjusted with 1", 1/2" or 1/4" spacers used between blades.

Triangle Cutter
Used for cutting croissants, scones and other triangle-shaped specialty products.

Oval Cutter
Used for cutting tortillas, pizza crusts and similar products. (Shown in optional high-density plastic.)

Cutters for Bench Use

Moline bench cutters are designed for manual use with easy-rolling, self-lubricating, polyethylene handles at each end.

The Junior models contain the same cutter cup sizes as machine models but are narrower for easy hand rolling.

Junior Hex Donut Cutter
Used for cutting yeast-raised donuts. The hex pattern provides a scrapless cut.

Junior Hex Biscuit Cutter
Used for cutting biscuits and bismarks. The hex pattern provides a scrapless cut.

Junior Round Donut Cutter
The round donut cutter is used for cutting yeast-raised donuts. (Shown in optional high-density plastic).

Junior Round Biscuit Cutter
Used for cutting rolls, biscuits and bismarks.

Junior Triangle Cutter
Used for cutting croissants, scones and other triangle-shaped specialty products.

Junior Long John Cutter
This rectangular cutter is used for cutting long johns, hot dog buns, sticks and bars.
