

MD-81 Depositor Cutter Rebuild Program

Extend Cutter Life by Refurbishing

The Moline MD-81 Depositor Cutter Rebuild Program allows existing cutters, if they qualify, to be rebuilt for further use. Send in your existing cutters, and based on our evaluation, we will rebuild them in one of two ways. Prior to rebuilding, Moline will contact you with a quote.

The Process...

Level 1 Rebuild

Sleeves are cleaned, and the disc is replaced and refitted to the sleeve.

Level 2 Rebuild

New sleeves and discs are manufactured and fitted together, and the landing areas of the nozzles are cleaned.

MD-81 Depositor Cutter Components

- *Optimally Maintains Existing Cutters For Extended Wear*
- *Returns Cutters to OEM Specifications*
- *Maintaining OEM Tolerances Provides Greater Weight Control*
- *Improves Depositor Performance*
- *Cost Effective Maintenance*

Note: Cutters are eligible for only one rebuild.

How to Submit Cutters for Refurbishing...

1) Contact Moline Customer Service

Let our Customer Service team know that you would like to rebuild your MD-81 Depositor cutters. They will issue a Return Goods number to you.

2) Submit Cutters For Moline Evaluation

Moline will evaluate your cutters to determine whether they are a good candidate for Level 1 or Level 2 refurbishment. Entire cutters (sleeve, nozzle and disc) must be sent to Moline for evaluation. Units that are very worn or damaged may not qualify for refurbishment.

3) Cutter Components are Refurbished

The submitted cutters are cleaned and refurbished. Any additional parts that are required, such as new stems, will be quoted to you prior to replacement.

4) Refurbished Cutter is Returned to You

Once the cutter has been refurbished, it is returned to the customer ready for installation on the depositor. Shipping is via freight carrier and is paid for by the customer.

5) Cost for Refurbishment

Cost for cutter refurbishment will be determined by the type of process for which the cutter qualifies. A quote will be submitted to the customer prior to refurbishment. Moline standard Terms apply.

Contact us to schedule an evaluation...

Note: Cutters are eligible for only one rebuild.
