

Assembly Electrician - Full Time - Duluth MN

Moline Machinery LLC is a leading industrial food processing equipment manufacturer in Duluth, MN, in business since 1945 and family owned. Our equipment is distributed both domestically and internationally to large high-volume industrial bakeries and food processors for the automated production of baked goods and other food products. The equipment we manufacture includes continuous assembly production lines with fully automated electronic touch screen control. Individual components for industrial production are also manufactured. Our campus includes office buildings, 120,000 Sq. Ft. of manufacturing space and a new technical center where Moline equipment and customer formulations are tested and proven.

Job Description:

An assembly electrician is a worker who has special training to assemble and erect mechanical components as well as install electric motors, component parts, and other electrical systems, used on standard and custom machines as manufactured by the Employer.

Duties Include:

Work from complicated drawings, schematics, and specifications to make electrical and mechanical connections required for assembly. Operate certain hand and machine tools as required for proper fitting, as well as crate and skid machines. Maintain proper quality and quantity production, as well as thoroughly inspect work products. Work with Engineering and other Production personnel to make modifications to parts drawings as needed and assist in final testing of equipment. Travel to international and domestic installation sites to mechanically and electrically install equipment.

Job Requirements:

- Associates degree in electrical wiring / industrial controls or equivalent experience
- Proven performance and at least 3 – 5 years related work experience in a machine shop environment, including experience in areas such as sheet metal, metal finishing, machine tool operation, and assembly.
- Understanding of how to view drawings and answer questions from them.
- Ability to interface well with other departments and work together to solve problems
- Answer questions or provide training to any co-worker, contractor, customer, or vendor when requested or directed by management.
- Strong organizational skills
- Good written and oral communication skills
- Team player; self-motivated, self-directing
- Strong attention to details
- Ability to prioritize and handle multiple, concurrent projects and tasks
- Basic computer skills and the ability to learn new software
- Knowledge of how to use standard measurement tools

Position is full time with competitive wages and benefits.
