Flatbread Production From Start to Finish

"Flatbreads...Now Mainstream"

What do breakfast burritos, snack wraps, gourmet pizza and fajitas all have in common besides flour and water?

All fall into the **Flatbread** category of healthy, easy to eat meals that fit today’s active life styles.

Moline sheeting lines fit this trend with high volume, low cost production techniques and the latest in equipment innovations.

From dough forming to industrial sheeting and make-up, Moline has the equipment you need to provide production rates that are the highest in the industry. The soft, thick formulations used for flatbreads and pizza crusts are easily manipulated by the YOGA II dough former and our industrial sheeters, including the new **LIBRA** sheeters. The result is a perfect combination of tenderness and light texture that make these products a favorite among both the health conscious and those who just love great bread.
