

Machinist - Full Time - Duluth MN

Moline Machinery LLC is a leading manufacturer of industrial food processing equipment in Duluth, MN. Since 1945, our family-owned business has designed and built automated production systems for high-volume industrial bakeries and food processors both domestically and internationally. Our products range from continuous assembly production lines with fully automated electronic touch screen control to individual components for industrial applications. With 120,000 sq. ft. of manufacturing space and a modern technical center, Moline is committed to innovation and excellence in delivering reliable, high-quality solutions to our customers. EOE

Job Description:

As a Machinist, you will be responsible for a variety of machine operations, including both standard and custom tasks, to fabricate parts for the machinery we manufacture. The ideal candidate will have experience working with precision measuring tools, CNC machines, and will be capable of adapting to a variety of machinist tasks.

Key Responsibilities:

- Interpret complex drawings and specifications to complete machining tasks.
- Utilize general shop mathematics for machine operations.
- Use a wide variety of precision measuring tools and instruments as required.
- Make jigs and fixtures necessary to fabricate parts.
- Grind cutting tools used in machine operations.
- Disassemble, rebuild, and replace parts in production shop.
- Assemble, erect, and replace parts of machines manufactured by employer.
- Operate CNC production machines.
- Design, modify, or create CNC programs as directed.
- Ensure high-quality and efficient production while thoroughly inspecting work products.
- Ability to crate and skid machines.
- Perform other related duties as assigned, based on skills and capabilities.
- Work with Engineering and Production teams to modify parts and drawings as required.
- Maintain a safe and clean work environment.
- Participate in production and team meetings as necessary.

Job Requirements:

- Associates degree or equivalent experience.
- 3-5 years of relevant experience in a machine shop environment, including sheet metal, metal finishing, machine tool operation, and assembly.
- Ability to read and interpret technical drawings.
- Strong communication and problem-solving skills with the ability to collaborate across departments.
- Ability to provide guidance or training to coworkers, contractors, customers, or vendors when requested by management.
- Self-motivated, detail-oriented and able to prioritize and manage multiple tasks efficiently.
- Basic computer skills with the ability to learn new software.
- Knowledge of precision measurement tools and instruments.

Physical Demands/Working Conditions:

- Work is performed on the shop floor.
- Must be able to lift up to 50 pounds.
- Frequent use of the phone and computer.
- High attention to detail is required.
- Occasional travel may be necessary.
